United is a founding member of the Star Alliance network. The airline has a rich history in aviation, tracing its roots to 1926 when a small Swallow biplane owned by Walter T. Varney carried airmail to Nevada from Pasco, Washington – a flight that marked the true beginning of commercial air transportation and the birth of United Airlines.

Today, the airline operates the most fuel-efficient fleet among U.S. network carriers with the world’s most comprehensive global route network, including world-class international gateways to Asia and Australia, Europe, Latin America, and the Middle East. United, together with United Express, offers approximately 4,700 flights a day to 356 destinations from hubs in Chicago, Denver, Guam, Houston, Los Angeles, New York/Newark, San Francisco, Tokyo and Washington, D.C. United employs 90,900 people worldwide.
